

DIG-FX
CONTRACTOR

**TREE SURGERY
SERVICES**

Tree Surgery Services

DIG-FX specialise in arborist and tree surgery services, ranging from small tree works to large scale site clearance.

Our knowledge and expertise can be used to accommodate your specific and individual requirements. At DIG-FX we have our own in-house arborists and tree surgeons which understand the importance of ensuring the safety of themselves, the public and your site. We can provide a complete package from tree and vegetation maintenance/chipping, clearance, and removal and/or recycling of debris ready for the next stage of development.

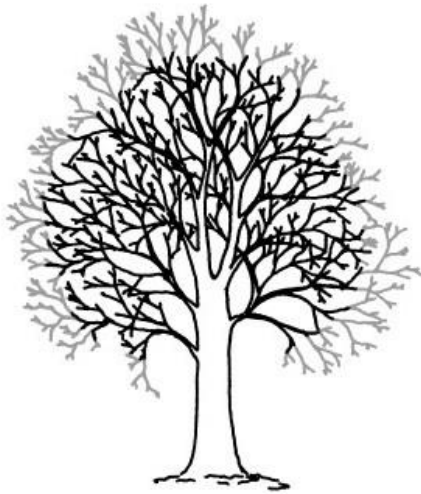

Key Features

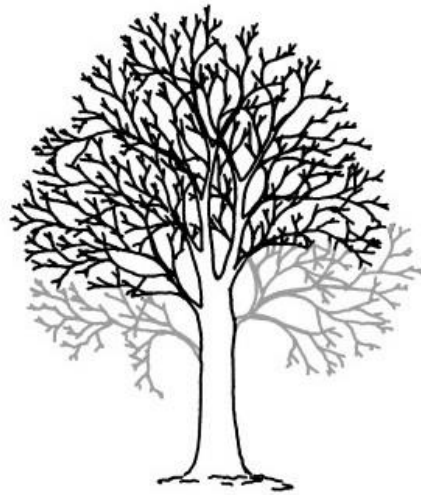

- ◆ Qualified and experienced contractors
- ◆ Flexibility with your site's requirements, ground needs and user needs
- ◆ In-house NPTC arborists and tree surgeons
- ◆ In-house NPORS plant operatives
- ◆ The right machinery for your time scales
- ◆ Safety at the forefront by following BS3998 guidelines
- ◆ Removal and Recycling of waste materials

Pruning and Tree Care

DIG-FX are experienced in offering numerous Arboricultural services according to your requirements.

Crown Reduction

Crown Lift

Stump Removal

Stump removal prevents infestations or spreading of diseases to surrounding trees and shrubs. It also gives you a fresh canvas for future landscaping designs. DIG-FX can remove any tree stump size, using specialist machinery to ensure they are removed safely and efficiently.

Once the stump has been safely removed, a sawdust like mulch is left behind. This will naturally break down, giving nutrition back to the ground for re-use or a recycle option off site is available.

Removal, Chipping and Clearance

DIG-FX offers a tree removal and chipping package. No tree removal is the same and because of this DIG-FX will carry out a site visit before any works take place to assess the best way for removal, whether by felling or dismantle.

With our in-house arborists and tree surgeons, DIG-FX can guarantee the safe and effective removal of trees and all forms of vegetation for re-use on site or recycling.

Root Protection Areas (RPA)

Root Protection Areas (RPA) often a feature within a site set up. DIG-FX have the knowledge and experience with our in-house arborists and tree surgeons in setting out coordinates for the dedicated RPA, conforming to BS 5837:2012. With the option to have the barrier's installed either in-ground or above ground (depending on your sites requirements), DIG-FX can guarantee the best practise for trees and your company.

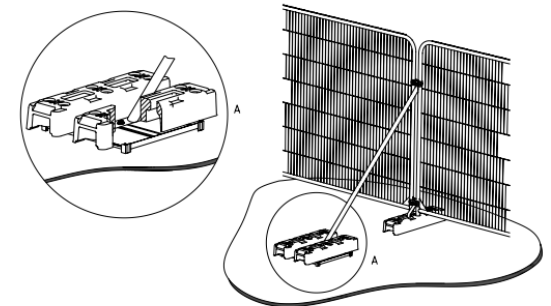

British Standards 5837:2012

Above ground

a) Stabilizer strut with base plate secured with ground pins

b) Stabilizer strut mounted on block tray

Regional Teams

For your no obligation quotation please contact us. A member of staff from DIG-FX Ltd will conduct a full assessment of your requirements.
